

Gentlemen,

Please dismiss RM-10740, and cite Glen baxter K1MAN for the following abuses to the service. The following abuses are well documented and should be brought to closure: excessive bandwidth, overmodulation, un-monitored broadcasting, willful interference, commercial use of amateur radio etc. etc. This one broadcaster occupies more than 20 Khz on a regular basis, and nothing is done to remove this station from the amateur radio service. Do we need a petition to shut down an illegal interference beacon station such as this? RM-K1MAN-off No rule changes needed, all that is needed is ENFORCEMENT!
